Undergraduate Research Conference at Queens College
2nd Announcement

There will be an Undergraduate Research Conference at Queens College sponsored by the Division of Mathematics and Natural Sciences on Friday September 23 from 10 am to 3 pm in the New Science Building (NSB). Posters will be displayed in the NSB Lobby, and oral presentations of research will be in room D-139.

Abstracts are due on September 13. A special form is required for abstract submission. This form will be distributed digitally through the Department Chairs to the Faculty to the students. The talks will be in power point format. The poster dimensions are 3 ft X 5 ft. To guide the students on where to place their posters on the day of the conference, the poster boards will have the student’s abstract on it. Students will be notified by e-mail about the time of their oral presentations.

Queens College is proud of the outstanding research conducted by its undergraduate students, and we encourage you to learn more about their work. Undergraduate students conducting research in the Division of Mathematical and Natural Science and in other Queens College Divisions will be participating in this event.

All students, parents, and family are invited to attend, as are faculty and staff. A book of students’ abstracts will be available for those attending the conference, and breakfast and lunch will be provided for those students that present work, their families, and faculty.

For information, please contact: Cecilia McHugh, assistant to the dean for the DMNS (emchugh@qc.cuny.edu, 718-997-3322; Matt Huenerfauth, Assistant Professor in the Department of Computer Science (matt@cs.qc.cuny.edu, xt 73264), or David Lahti, Assistant Professor in the Department of Biology (david.lahti@qc.cuny.edu, xt 73422).
